

## **About lock**

### **WHAT IS TSA?**

**TSA: TRANSPORT SECURITY ADMINISTRATION**

TSA locks are required for all customers travelling to the USA. The TSA screens every passenger's baggage before it is placed on the plane. At their discretion, from time to time, they choose to open a passenger's luggage for closer inspection. When this occurs, if the luggage is fitted with any lock other than those approved by the TSA, they will destroy whatever lock is fitted to gain access.

Luggage locks approved by the TSA have a universal master key that will open the locks. Only the TSA have a copy of this master key. Every TSA approved lock has an identifying mark that shows it may be opened by the master key. All Coolife TSA locks feature the red TSA logo.

### **How to RESET YOUR TSA LOCK**

**Step1:**

Dial the three wheels to 0-0-0, which is the default combination setting for the luggage.

**Step2:**

Press the reset button with a pen or a toothpick and you will hear a click sound.

**Step3:**

Enter the new combination of your choice. For example:8-8-8.

**Step4:**

Pushing the tab lock to lock the number you just enter, and you will hear a click sound again, then done.

There you have it! Instructions for resetting the TSA combination lock.

### **How to RESET YOUR Combination LOCK**

**Step1:**

Dial the three wheels to 0-0-0, which is the default combination setting for the luggage.

**Step 2:**

Pull and hold the unlock button on the side of the lock. (Do not release the unlock button before finishing the whole process!)

**Step 3:**

Enter the new combination of your choice. For example:8-8-8, then release.

There you have it! Instructions for resetting the combination lock.

## **How to RESET YOUR BIDIRECTIONAL TSA LOCK**

### **Step 1:**

Dial the three wheels to 0-0-0, which is the default combination setting for the luggage and open the luggage.

### **Step 2:**

Twist reversion pole from B to A. (Notice that the reset button is inside of the luggage)

### **Step 3:**

Enter the new combination of your choice. For example:8-8-8.

### **Step 4:**

Finish the reversion process by pushing back reversion pole from A to B.

### **Step 5:**

Close the luggage and random the password you set, the lock will be locked.  
There you have it! Instructions for resetting the TSA combination lock.
